SOLO Handheld Controller

The Handheld Controller is a dedicated set-up device which provides clients with the ability to configure SOLO transmitters and receivers without the presence of a laptop and control application. The compact controller operates with a touch screen and daylight-viewable LCD and is housed in a rugged aluminium enclosure. As it is a low power device, it can be run on rechargeable batteries, adding to the portability. However, the system can also be run from an external power supply. The controller has been designed to operate on a "plug and play" basis and can detect multiple connected devices, like the receivers in the domo MultiPIX.

Features:

- Compact and portable
- Can connect to any SOLO transmitter/receiver
- Low power consumption
- Rechargeable batteries or 1 2V DC input
- Robust aluminium enclosure
- Daylight-viewable LCD with touch screen
- Sleep mode to aid battery life
- Receiver status page to free up front panel for video only.

Specification:

Input	
12V DC in	Lemo
Battery charger	Mini DC power socket
Input/Output	
RS-232 Control	Lemo
RS-232 Data	Lemo
Physical	
Dimension Base Unit	L 266mm, W 168mm, H 32mm
Weight Base Unit	1kg
Power	

DC input	6 to 12V
Internal NiMH rechargeable batteries	6 x 1.2V = 7.2V
Power Consumption (operating)	<1.5W
Power consumption (asleep)	<25 mW

Environment	
Temperature Range	-10 to +50 deg C

Products are available to security users only, in licensed frequency bands. These products are not approved for use by unlicensed users. Commercial products are available to unlicensed users – please contact us for details.
